

## Claims

- 1) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum in liquid form, wherein said flexible bag is constructed from plastic material, excluding, for the said material in direct contact with the said pharmaceutical preparation, PVC-based material.
- 10 2) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to Claim 1, wherein the envelope of said bag has a multi-layer structure.
- 15 3) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to one of the foregoing Claims, wherein the liquid solution of oxaliplatinum is in contact with an internal layer of the said envelope consisting of a polypropylene material.
- A
- 20 4) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to one of the foregoing Claims, wherein the concentration of oxaliplatinum in the pharmaceutical preparation is between 1 and 8 mg/ml.
- 25 5) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to Claim 4, wherein said concentration is between 1 and 5 mg/ml.
- 30 6) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to one of the foregoing Claims, wherein said flexible bag consists of two welded sheets of multi-layer sheet material comprising one film of polyamide of 11-amino-undecanoic acid bonded by at least one of its surfaces to a film of polypropylene by means of a film of polyolefine, the polypropylene films forming the internal wall of the watertight flexible bag.

5 7) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to one of the foregoing Claims, wherein said flexible bag is multi-compartmented.

10 8) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to Claim 7, wherein the multi-compartments are defined in such a way as to allow the dosing of a ready-for-use preparation.

15 9) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to one of the foregoing Claims, wherein said solution has a pH of 4.5 to 6.0, a concentration of oxaliplatinum in the preparation of at least 95 % of the initial concentration, as well as a clear, colourless appearance free from precipitate after storage for a pharmaceutically acceptable period.
